The Path to Newton

PERVAILING BELIEF: Copernicus' heliocentric model was widely accepted.

CONCERNING OTT FAVORITES: Galileo's heliocentric model was widely accepted.

TOOLS AVAILABLE: Telescope, telescope, telescope.

MATH AVAILABLE: Calculus, calculus, calculus.

BIG IDEAS: Copernicus' heliocentric model, Galileo's heliocentric model, Newton's heliocentric model.

CONNECTIONS BETWEEN IDEAS: Galileo's heliocentric model led to Newton's heliocentric model.

"Lost without Longitude"

```
graph TD; Start([Start]) --> Action1[Take out phone]; Action1 --> Decision1{Phone is on?}; Decision1 -- No --> Action2[Find my coordinates via phone]; Action2 --> End([End]); Decision1 -- Yes --> Action3[Find latitude via or if possible using the Sun or stars]; Action3 --> Decision2{Latitude found?}; Decision2 -- No --> Action4[Find longitude via or if possible using the Sun or stars]; Action4 --> End; Decision2 -- Yes --> End;
```

last updated about 14 hours ago

In 1687, Isaac Newton published his *Principia Mathematica* and inaugurated a revolution in physics that would reign supreme until the introduction of Einstein's relativity in the early 20th century. Even though relativity shakes some of the foundations of Newtonian gravity, its modifications are negligible in nearly all Earth-bounded situations. To this day, in classrooms all around the world, Newton's principles and physics continue to be taught and undergird fundamental assumptions about how the universe works.

At the heart of Newton's work was a rigorous definition and mathematical description of *force*. Up until this point, force was theorized qualitatively and used as a noun to describe something being acted upon by something else; however, with Newton, force became an entity unto itself. Since the days of

John Snow Society mag.
ROSALIND: Yes.
So he had, if you like, he'd got the data.
And this was just another way of demonstrating it.
It wasn't how he solved the outbreak.
DON: When I talk to my students about this, I always ask them, **so did John Snow perform a case control study,** which is fundamental in epidemiology.
It's the greatest tool for working up outbreaks that we have.
In a case control study, you study the exposure of the cases, in this case, water pumps, and the exposure of the controls, the people who were
